

## To Suisun City Residents and Businesses

## 2023 Slurry Seal Project

Your street is scheduled to receive a pavement sealing (slurry seal) as part of the City's Public improvement Projects. The scope of the project includes surface preparation over the roadway, crack sealing, slurry seal, and pavement restriping. This pavement preservation strategy involves placing a mixture of an emulsion and fine aggregate on the asphalt surface. This treatment slows pavement deterioration due to weather elements. The City's contractor for the project is Dryco Construction, Inc. The slurry seal work is scheduled to occur during the week of August 21, 2023, followed up with re-striping of streets over the following two weeks.

<u>How Will I Be Affected?</u> This work requires the street to be closed or have restricted travel access for an 8-hour period. If your driveway is on a road listed for treatment, you will need to plan for having limited access to your driveway during the performance of this work.

This is your notice for the day work will be performed on your street. This notice will include the start date and duration of the work. You will also notice temporary "No Parking" signs on your road with specific no parking dates written on them. "No Parking" signs will be posted on portable barricades at least 48 to 72 hours in advance of the work that will restrict parking. Please park on an adjacent street to avoid having the vehicle towed.

## **SCHEDULE ON REVERSE**

## On the Day of Your Street Maintenance

Please note that walking and biking on the sealed street will not be possible while emulsion is wet.

A successful street maintenance program relies on your cooperation. Please note the following:

- Garbage collection should not be interrupted.
- Emergency vehicles will always have full access to these roads.
- Please do not leave your driveway after the noise and activity of the crew has left, as this is the curing time for the
  wet oil' to dry.
- Do not drive, walk, play, skate or allow pets on the sealed street until it has dried. Walking on the newly sealed street will leave black residue on the bottom of your shoes. The residue is known to damage some surfaces, will mark all surfaces that you track it on, and will be very difficult to remove.
- Wait at least 24 hours after the road has been reopened before washing your car or turning on any sprinklers.
- Attempt to make rolling turns as opposed to sitting stationary while turning your steering wheel to prevent "power steering burns" in the fresh micro surfacing.

Questions or Concerns? If you have any questions about this project, please contact:

Dryco Construction; Mike Wallen at 916-381-8033
